

# Meeting Overview 2/27/26

Meeting held at 9:45 to 10:30 am

Attendees: Adarsh Gella, Kade A O'bar, Dennis Keithly, Ben Stidham, Christopher Chaiban, Jose Rodas

Meeting Overview written by: Kade O'Bar

The purpose of this meeting was to showcase our work to the TA from the past week

Dennis explains our work for the week, all information also listed in the weekly report

Dennis shows data collected to TA with his screen, has data files prepared for the AI

TA suggests for the website to requesting location from persons computer

After Jose and I show our progress on Figma he suggests using AI (figma make and stitch with google) to make the process quicker, otherwise TA approved

The AI we plan use so far is Gemini, maybe antigravity

Ben shows progress on boilerplate for the frontend

TA suggests Playwright for the scraping of data

TA requests a spec file to be made based off the one he shared on teams

The end of the meeting we all went through the weekly report and our plans for the following week.

To-Do:

Complete Spec File

Individual Person To-do for next week
