

# 2/20/2026: Meeting Overview

Meeting held at: 12:00 pm

Attendees: Sridhar Alagar, Adarsh Gella, Kade A O'bar, Dennis Keithly, Ben Stidham, Christopher Chaiban, Jose Rodas

Meeting overview written by: Dennis Keithly

This meeting was held to go over the progress that was done during week 1 (2/13/2026 - 2/20/2026). The following things were discussed:

- Ensuring the team was meeting outside of the meeting with Dr. Alagar.
  - Shortly after this meeting, a meeting was decided for 2/21/2026 at 2:30 pm to decide on tasks for the next week
- Making progress on github
  - Defining architecture for the backend and frontend of the project and creating boiler plates for both
  - Making a schema for the backend
  - Beginning to work on the figma for the frontend
- Testing AI tools/agents to aid in the development process for the team. These should assist in coding, research, and documentation
- Data should be gathered through either querying of the data through tools that exist or a data scraper should be created.
  - Once gathered the data should be formatted so that the AI can be trained off of it
- API calls should be developed, at least a first API call should be made

Next team meeting planned for: 2/21/2026 to determine specific tasks for the week.

Next meeting with client planned for 2/27/2026
